# Cross-Wave Harmonized Marriage Roster

*Created by Carol Roan updated September 2025 to include data through the 2022 round (R08) of data collection.*

The marriage roster uses information from each wave of the survey and administrative data to create a complete harmonized marital history. Although there were variables through R05 that mimicked a roster, we had never tried to reconcile information across waves. For simplicity, the roster is stored in long form (one record for each marriage) rather than wide.

This roster reconciles differing reports across rounds. These changes are only made in the harmonized marriage roster.

The roster includes a record for every person (19,046) in the WLS. People for whom we have had very limited contact, or who refused questions on marriage are included in the roster with the total number of marriages (nummar) coded as -4 meaning "Not Ascertained."

*Measures disclosing month are not included in the public version.*

Using the R0#spflg variables users can match up more detailed information in the main data set to the marriage.  If the flag variable equals one, then you know that any question about "current spouse" is referring to the spouse in this particular marriage or mar_num. There are two exceptions,

In R03 (1975 for graduates and 1977 for siblings), participants were asked questions about current spouse for married participants or last spouse for separated, divorced, or widowed participants.  When R03lstspflg equals one then this marriage is the correct marriage for any question that is referring to the last spouse.

In R02 (1964), parents of graduates were surveyed by postcard. Parents of male graduates were asked about their son's occupation. Parents of female graduates were asked questions about their daughter's husband's occupation.  R02spflg is set to one in marriages that were active at the time of the 1964 survey. Thus, the characteristics of the husband's occupation may refer to the male graduate or to the female graduate's spouse.

Here is a list of analysis variables you can pull from the main file using the Cross-Wave Harmonized Marriage Roster flag variables
